## Ventilation

Heat and steam the ingredients, not the chef.

From the hidden and discreet to statement pieces, every model within our ventilation series performs the same function, but panders to a different space. And like black garlic, our ventilation removes the undesired effects of your gastronomic endeavours.

Ventilation is the unsung hero of the kitchen, capable of turning unbearable conditions to pleasant ones, converting odorous foods into favourites. It is not at the forefront of your mind when creating your kitchen, unless you are a chef at heart. Then it is a big deal. We have made ventilation either invisible or a show piece; in the case of the table ventilation, it is both.

Effortless, silent and clever. The ventilation 400 and 200 series capture vapours and odours from a collection of extractors which can be controlled manually or automatically, adjusting power levels in reaction to the atmosphere. From the rise and fall of the extendable table concept, the surface-mounted downdraft, the integrated modular ceiling model to the wall-mounted, island or extendable flat hood, each achieve power without bulk and extraction at a whisper.

Everything has been designed with discretion and airflow in mind, creating a system that performs exceptionally and quietly behind the scenes.

## The ventilation 400 series

There is a science to perfecting a room's ventilation. That does not mean it has to be without style. Our wall-mounted hoods complement our cooktops in both scale and ability. For those of you who prefer to work not facing the wall, there are island hoods or, for those who do not want anything to get in the way of their view, we offer a modular ceiling unit that can control the entire room's environment almost regardless of size and layout.

The wall-mounted and island hoods ensure your open plan lifestyle does not include grease and vapour. Highly efficient baffle filters, originally developed for professional kitchens, remove vapours almost entirely. Flush, dimmable LEDs can bathe the worktop in neutral white light or provide ambient lighting for the kitchen.

If a more minimalist approach is desired, with nothing in clear sight, there are the cooktop ventilation designs. Where the downdraft ventilation is subtle, removing steam and odour almost unseen, the table ventilation rises from the surface like a metallic wall.

This is ventilation that is capable of so much more than you can throw at it.

The **downdraft ventilation** was our 1976 innovation that we have been perfecting over the decades. Seamlessly fitting into any Vario cooktops 400 arrangement, the downdraft system offers effective odour and vapour removal at source.

Utilising the same stainless steel controls as the cooktops, it blends into the series, drawing steam and odour down into the worktop. The flap and filter have been designed to reduce noise and improve airflow through the space-saving flat duct system. Low profile ducting leads to floor-mounted remote fan units. Specially designed grease filters increase air flow and absorb more, while the activated charcoal filters are designed to offer greater surface area to the air before it is re-circulated into the blissfully clean room.

The **table ventilation** rises and falls from the island, capturing the vapour and odours from the very top of the pans, while directly illuminating the worktop without catching the eye through dimmable LEDs. Each system is designed with an automated ventilation feature that vents the area for a few minutes every hour and it is equally happy to extract or recirculate the air.

The **Vario ceiling ventilation** is a modular, modern solution integrated into the architecture. With the fan unit housed externally, the flat profile need only accommodate the dimmable lighting, filters and ducting. Finally, you have a remote control that can clear a room, fast.

The Vario ceiling ventilation

## The ventilation 200 series

The ventilation 200 series offers the private chef a determinedly efficient set of options. From the downdraft at counter level to wall-mounted and island hoods. Integrated ceiling ventilation, invisible canopy extractors and flat kitchen hoods hidden within kitchen units. Wall-mounted and glass-fronted, the eye-catching angled and vertical designs are available in three colours: Gaggenau Anthracite, Metallic and Silver. All these ventilation units offer a host of considered benefits.

Each provides high-powered illumination or attractive mood lighting, recirculating or externally venting the air. Simple to manage, easily removable filters are dishwasher-safe as well as utterly effective. They can also be manually controlled or function on automatic, self-adjusting the fan speed depending on the fumes they detect. Their quiet power impresses.

Air movement never looked so good.

The angled and vertical wall-mounted hoods are a striking, glass-fronted design statement in the three colours Gaggenau Anthracite, Metallic and Silver, while their reduced noise belies their extreme effectiveness.

Everything about the timeless design has been created to cancel noise and collect vapour. Their intelligent design ensures they capture more vapour at lower power settings. The activated charcoal filter is especially efficient at removing odours while the regenerable activated charcoal filter, available as a special accessory, offers many years of use. Both enable the near silent, well insulated motor to operate at even quieter levels. This lack of noise and strong aesthetic does not compromise the performance in any way. The ventilation is fully capable of drawing in all the vapour you can create with three electronically controlled power levels and one intensive mode, made even more effective by simply opening the glass screen a little.

The hoods' dimmable, ambient lighting is offered in a choice of four Gaggenau hues: Cool White, Neutral White, Warm White or Orange.

**Ceiling ventilation** in the striking 200 series offers two options: either discreet integration into the architecture of the kitchen or directly installed on the ceiling.

**The downdraft ventilation** was our invention in 1976, it is for those who prefer their ventilation unseen and away from their head. At 8.5 cm wide, it is the minimalist hero of the Vario 200 series, quietly removing odours, vapours and grease, without making a big thing out of it.

**The wall-mounted hood** offers statuesque options where cupboards are not in the way. 90 cm and 120 cm of stainless steel, energy efficient, vapour extraction, with an attractive and easy to clean, flat underside and near complete odour elimination. It looks effective because it is.

**The island hood** impresses in terms of technology as well as appearance, in 90 cm classic box design. Extremely efficient due to the rim extraction filter and optimal airflow interior. The integrated LED lights put either style in the spotlight.

The ceiling ventilation

The downdraft ventilation

The wall-mounted hood

GAGGENAU

GAGGENAU

The **flat kitchen hood** is an intelligent, space-saving solution. It sits effortlessly within the confines of a 60 cm and 90 cm width. Discreet, extendable and quiet. It opens out beyond the cupboard via a clever mechanism whilst an optional lowering frame allows the hood to be completely concealed within.

The structure offers an integrated glass panel, dimmable lights, three power levels plus an intensive mode as well as an automatic function that works out its optimal power setting. All of which slots neatly back into invisible obscurity when you are done.

The **canopy extractor** is another powerful option whenever space is at a premium. The quiet motor can be completely enclosed within the kitchen furniture and offers three power levels plus an intensive mode. The easy-to-clean glass cover and dimmable illumination are all encased in stainless steel, hidden from view but close to hand.

Being quiet, almost invisible and fully equipped, this is power, at your discretion.

## Cooling

Freshness, extend it.

Our extensive cooling portfolio ideally complements your kitchen and inspires the private chef with the freshest of ingredients. Our flexible modular and free-standing ranges have the ability to sense and react to the most delicate and demanding of foods in an intelligent way. The large, fragrant Japanese Shiso mint leaf is a delicate seasoning, a bold garnish and even a wasabi receptacle. It requires sensitive refrigeration.

Some provisions require that little bit longer to mature, while others favour a particularly cool environment. The impressive Vario 400 and 200 series refrigerators, freezers, fridge-freezer combinations and wine climate cabinets offer multiple, separate climate zones. Their exceptional performance is thanks to the quality and precision of their cooling technology. Food is maintained in optimal conditions to ensure radicchio stays crisper, grapes last longer, meat and fish taste fresher.

For the wine lover, your collection requires more cherishing than the delicate mint leaf. Your wine needs to be stored, protected, showcased and prepared for enjoyment. These are competing functions which your wine climate cabinet, equal to a wine cellar, achieves year after year with unflappable aplomb.

## The Vario cooling 400 series

A fully integrated, built-in modular family: refrigerators, freezers, fridge-freezer combinations and wine climate cabinets can be partnered in a multitude of ways to create an impressive display. Should you wish them to stand out, you can even customise the effect with the addition of stainless steel doors.

The new Vario 400 cooling series is a professional modular system made from fully integrated built-in appliances. Reduced to the essence of pure refrigeration, their design is most impressive when combined in countless variations to form an elegant cooling wall. Beyond its imposing visual effect, this array can also increase the flexibility of the kitchen's interior space. This is cooling that makes an architectural statement.

Our wine climate cabinets are equally exacting; display lighting and crafted bottle trays show off your coveted wine collection like an art exhibit. Up to three separate zones, provide you with both a cellar environment and the perfect drinking temperature. All you need do is remove the cork.

Push the enormous stainless steel door and it opens to a professional-grade stainless steel interior with dark anthracite anodised aluminium elements, housing almost imperceptible clear glass shelving. The two new opening assist options allow even the largest and heaviest of doors to be opened effortlessly, either by pulling or, for the handleless option, with a gentle push.

The minimalist internal aesthetic is accentuated by warm white, glare-free LED lights that discreetly and gently illuminate. Thanks to the near-invisible rail system the heights of the shelves and door racks can be easily adjusted and even aligned to produce a reduced, pleasingly uniform, appearance.

Cooling precision is assured with evenly distributed temperatures, while a variety of climate zones can also be individually adjusted. Using Home Connect, the appliances integrate into your digital home, and can be adjusted remotely. Ideal storage conditions are also met inside the cooling drawer, preserving your meat and fish for longer, thanks to temperatures close to, or even at, 0 °C.

Fully extendible freezer drawer and warm white, glare-free LED lights

Solid dark anthracite anodised aluminium door racks

## The wine climate cabinets

For serious wine aficionados, wine is a passion bordering on obsession, equalled only by the desire for the ultimate in storage. A wine climate cabinet needs to not only maintain constant temperatures ensuring storage precision, but also showcase your collection whilst enhancing the prestige of your kitchen.

The Vario wine climate cabinets 400 series now make it even easier to access your collection with assisted opening. The choice of pull or push-to-open mechanism is dependent upon whether you opt for handles or not. Hidden telescopic rails allow the bottle trays to fully extend, while the use of oak rods and dark anthracite aluminium gently secure the wine and enhance the presentation.

Up to three independently controlled climate zones are controlled via the intuitive TFT display. Part of your collection can be stored in cellar-like conditions while those bottles that should be enjoyed now, can be served on demand. Humidity is maintained at a specified setting whilst sound and vibration are minimised, ensuring a calming environment, inside and out.

A choice of five pre-set options using of warm white, glare-free LEDs further help to present your impressive collection in a flattering light.

With niche widths of 45.7 cm to 61 cm and heights between 82 cm and 213.4 cm, the wine climate cabinets can be fully integrated into a wall configuration or fitted beneath a counter. Electronic temperature control guarantees constant temperatures between 5 °C and 20 °C.

Illuminate the wine or decanter with the dimmable presentation light. It highlights without adversely affecting the contents and the cabinet maintains the wine's temperature, so that each glass is sampled at its best.

**The fully integrated wine climate cabinet** blends effortlessly into a cooling wall concept, providing easy access to your prized possessions. While oak rods protect the label and the special glass door shields the wine from UV damage, the lock is the only thing protecting it from you.

**Under-counter wine climate cabinet** integrates perfectly into any kitchen whilst offering one or two climate zones and even a dimmable presentation light. Despite fitting into the constrained space under a counter, it holds up to 42 bottles in perfect comfort.

The interior environments of all wine climate cabinets have been constructed with materials designed to have no effect on aroma or taste, with the internal air even being passed through activated charcoal filters. Exceptional engineering has gone into making the compartment virtually vibration-free and the cushioned door closing system ensures you do not disturb any remaining bottles.

The Vario wine climate cabinet 400 series

The fully extendible trays

The fully integrated wine climate cabinet

## The Vario cooling 200 series

This range of refrigerators, fridge-freezer combinations and freezers fits perfectly into any standard integrated kitchen design and yet manages to offer greater internal space than standard cooling appliances.

We achieved this with some intelligent engineering, relocating part of the technology into the plinth. Not only do you have greater space to work with, you also have some rather brilliant advantages: up to four climate zones, Gastronorm insert shelving and the fresh cooling close to 0°C drawers that maintains the originality of your salmon, steaks or artichokes. Several appliances even offer Home Connect, allowing your appliance and smart home to be digitally integrated.

Smooth-running, fully-extendable shelves and drawers mean all that clever space is easy to access. And when you do, finally, close the door, it will soft close for you.

Elegant and impressively efficient, the fridge-freezer, refrigerator and freezer range offers multiple combinations. Each with a niche dimension of 56 cm wide and 177.5 cm high. With a more considered and innovative approach to their development, everything has been maximised: space, performance, energy efficiency and choice.

Private chefs know that there are great differences in how food needs to be stored. With our refrigerators, foods can be separated and enjoy bespoke preservation. Alongside one generous cooling zone are numerous drawers – one with humidity control for delicate and precious groceries.

Stepped shelving allows for that extra large item to fit in, effortlessly. Special Gastronorm inserts can be added, expanding your cuisine accomplishments, making it a seamless journey from prep and fridge to cook and serve. Not only will you save on dishes, you will make the most of the internal space. The inserts slide smoothly into their specific slots.

The fridge-freezer combinations offer multiple climate zone within their enlarged flexible space. The 4-star freezer is equipped with No-Frost technology, removing the burden of thawing it out. Other impressive functions include electronic temperature regulation and fast freezing.

The wine and champagne racks hold up to four bottles and should you ever find yourself without, the rack folds out of the way.

The stepped shelving and Gastronorm inserts

## The cooling 200 series

This range offers a myriad of cooling solutions: you can lose yourself in up to 541 litres of cool volume or fit one of our refrigerators or freezers into a compact 60 cm by 82 cm slot. Large or small, our minimalist, clean lines make our cooling 200 series a pivotal addition to any room. Choose from a collection of capabilities such as distinct climate zones, fresh cooling drawers, 4-star freezer compartment and adjustable shelving.

After all we are Gaggenau, we define our own standards.

## Dishwashing

Because not everything is just a dish.

It is precious, fragile, carefully protected for decades, holding more memories than food and a witness to your family at its most natural. Treat your crockery to the dishwasher it deserves. And as with truly great cooking, some modern tableware proudly shows off the handcrafted techniques used to create it.

Our dishwasher 400 and 200 series sit seamlessly in a Gaggenau kitchen featuring all the little, and not so little, touches you have come to expect from us. From the intuitive controls, clear TFT displays, handleless push-to-open doors, Zeolite technology to clever loading options that adapt to large and precious items. All of which becomes beautifully and innovatively illuminated with a new, glowing, lighting concept that welcomes you to your glistening crockery.

Washing up is never going to be fun, but it can be made exceptional.

## The dishwashers 400 series

A gentle nudge opens the handleless door, bathing you in a diffuse light as baskets are gently glided out on smooth running rails – a little push and the cushioned closing occurs. All is designed to protect your delicate glass and porcelain whilst deceiving you into thinking you are doing something far more special than mundanely loading the dishwasher.

Choose from two heights, 81.5 cm or 86.5 cm, with flexible hinges available for longer furniture fronts. Liberal with space, powerful and quick, it is also smart. Offering a multitude of washing options, a flexible basket system, clever long-stemmed glass holder and Home Connect.

This is an accommodating space, where great care has gone into every folding spine and adjustable rack. Zeolite technology reduces the eight programme times, enhances drying and decreases energy use. This series is skilful, it can even project the remaining time of the programme onto the floor, on models without flexible hinges.

The innovative lighting concept softly illuminates, revealing the carefully cleaned contents. Emanating from deep within, it highlights the sparkle of the dishes and presents your tableware in a new light.

The control panel with TFT display details the eight wash programmes with five options. While some are guided by internal sensors, they can be combined to operate on Power or Intensive yet be sensitive with the delicates.

Innovative Zeolite technology helps all our dishwashers within the series achieve their speed and A+++ Energy efficiency class\*. An eco-friendly mineral that absorbs moisture as it releases heat, Zeolite helps wash and dry a full load in under an hour and protects delicate glassware by drying them at a lower, gentler temperature.

As powerful as the range is, it is also quiet and delicate with a push-to-open and cushioned closing system. Smooth running rails are on two or three levels, upper baskets can adjust to three heights and the cutlery drawers can be enlarged to hold items such as cooking utensils and espresso cups. For ease of use, the interior is perfectly illuminated.

\*At a range of energy efficiency classes from A+++ to D.

The TFT display

## The dishwashers 200 series

Meticulous, considerate, clever, the dishwashers 200 series performs above expectations.

Different heights and widths, up to six programmes with three adjustable options, a flexible basket system, Home Connect and for some designs the remaining time of a cycle is projected onto the floor. These are dishwashers that succeed in making life easier.

Open the door and it offers up its contents on smooth running rails. This subtle touch carefully glides your precious glasses and crockery into and out of the gentle, yet thorough machine. The only time your wine glasses should clink together is when you are drinking from them.

Two models feature TFT controls in a stainless steel panel on the front of the fascia. They also offer a smart innovation if you are going on vacation or leaving your country abode: choose the automatic door opening function and at the end of their wash cycle they will open and air themselves and their contents.

There are both integrated as well as fully integrated dishwashers in the 200 series, all with an impressive energy efficiency class of A++ or A+++\*. Most offer a flexible basket system, folding spines, smooth running rails, special holders, over extendible and height adjustable upper basket and numerous intricate adjustments, so all of your kitchenware can be accommodated. To fit into your individual kitchen, flexible hinges are available on some models to allow for an extra length frontage and narrow plinths.

**Six programmes**, some sensor-controlled, which can be combined with three options, such as Power or Intensive. Or, given the technical skills of our Research and Development department, you could just choose one of our suggestions.

\*At a range of energy efficiency classes from A+++ to D.

### <sup>⬆</sup> Home Connect

\*Energy efficiency class: at a range of energy efficiency classes from A+++ to D.

60 cm wide dishwashers are available as 86.5 cm and 81.5 cm tall units. The 45 cm wide dishwasher is 81.5 cm tall.

The extraordinary, becomes connected.

Gaggenau and Home Connect\*

### The difference is Gaggenau.

This is the beginning of the future of cooking. Aided by a digital device, the private chef can, for instance, pre-heat the oven, turn on ventilation, start the dishwasher, order accessories from the eShop, download digital user manuals and have a technician run a diagnostic check, all remotely.

Integrating into different home managements systems ensures the kitchen remains the heart of the digital home. The private chef can ask Amazon Alexa to prepare a cup of coffee and turn on the ventilation while checking remaining time of the oven.

- Connect: Remotely control\*\* and monitor. Enable remote diagnosis by an online technician.
- Access: Purchase accessories via eShop, download user manuals and utilise our partnering network.
- Integration: Compatible with different home management system.

This is just the start, explore the possibilities at [home-connect.com](http://home-connect.com).

\*The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country. For further information please check: [home-connect.com](http://home-connect.com).

\*\*Not applicable for cooktops, cooktops are not intended for unattended use – cooking process must be supervised.

## Revelations

A beautiful enclosure of culinary delight. This is the promise of Gaggenau, the expectation of the chef, the realisation of the diner.

As the Physalis illustrates, exceptional design, quality and functionality need not compromise visual appeal, instead it fuels an ever-changing nature. This evolving design ethos, 333 years in the making, continues to unfurl ahead of us.

## Beyond the kitchen

Together with inspiring visionaries, artists and artisans from around the world, we explore various topics within the areas of cuisine, architecture, art, design and more.

Immerse yourself into our world either via our website or for the more socially minded via our pages on Instagram, Pinterest or Vimeo.

Enlightening previews of the avant-garde for the cultural cognoscenti.

# GAGGENAU

Our website offers the comprehensive story of each product as well as more information about us, our history, your nearest showroom as well as resources for architects and kitchen designers.
