Heinrich Blanc, founder of BLANCO

BLANCO manufactures over 1.5 million sinks in Germany each year

## Over 90 years committed to innovation

Quality has been key to BLANCO ever since the company was established in Germany back in 1925. Started by Heinrich Blanc, the business was founded on the principle of offering its customers the best in terms of design, function and innovation. Whilst our products may have changed considerably in response to changing times and needs, our commitment to quality and service remains as firm as ever. Helping people create their perfect kitchen has always been at the heart of our thinking. And it always will be.

### Making the most of your kitchen

BLANCO is an international business. We focus on providing the very best from our Head Office and manufacturing plants in Germany. We supply our superb range of sinks, taps and kitchen accessories to world markets. We strive to provide a combination of quality, value and service that has become the bedrock of our growth and success.

Our products have a reputation for innovation, versatility and high quality. We also offer exceptional choice with different materials, colours and models.

But if your options go beyond the sinks in this brochure, we can also provide custom-made BLANCO STEELART solutions tailor-made to your specification.

BLANCO is in a position to extend this service through in-house experts recognised for their diligence and skill as craftsmen in Stainless Steel. Together we can translate your vision into a three-dimensional reality.

The BLANCO pursuit of excellence is regularly recognised and rewarded by a number of international organisations who specialise in awarding accolades in recognition of perfection.

Did you realise that 60% of time spent in the kitchen is at the sink? Thus the kitchen sink is the most important workplace in the kitchen. To ensure that food preparation, washing and cutting and other essential tasks are as efficient as possible, our multidisciplinary teams constantly work on the perfect balance of function and aesthetics. Our kitchen sinks incorporate the benefits of sensible space utilisation, ergonomic design and ease of cleaning. It is our priority to ensure that kitchen sink design, colour and style suits your overall kitchen look.

## 3 Simple steps to create your ideal kitchen

Having taken great care in selecting the furniture and appliances for your new kitchen it is also important that the sink and tap you select meets your criteria. The BLANCO SELECTIONS Studio Collection represents a wide choice of models selected from the extensive BLANCO range. Each model has been carefully chosen to provide a combination of practical benefits and real value for money.

**A handy checklist to help choose your ideal kitchen:**

### 1. Choose a sink

- Measure the cabinet width of your kitchen
- Choose the material of the sink
- Choose bowl configuration of the sink

### 2. Add accessories and extras

- Choose from a range of contemporary accessories
- Explore our range of waste disposers

### 3. Choose a tap

- Choose from the full range of taps
- Check with your retailer / installer that your water pressure requirements will work with your chosen tap

# Materials and finish to suit your lifestyle

You have your own unique vision of what makes the perfect kitchen. How you use your sink is important when deciding which material is right for your kitchen because each precision-engineered material has individual characteristics and benefits. Our range covers everything from the latest contemporary trends to classic lines, so all you have to do is choose the one that best complements your cooking style and personality.

## Stainless Steel

Stainless Steel differs from most materials in that it can be integrated into almost any kitchen environment. Its most important properties:

- Timeless classic aesthetics
- Does not rust
- Completely heat resistant
- Hygienic and suitable for food preparation
- Stain and acid resistant
- Easy to care for

BLANCO uses only the highest quality 18/10 Stainless Steel to meet the most exacting requirements.

## BLANCO Ceramic

Sinks made of BLANCO Ceramic create a special homely atmosphere.

Their attractive appearance and glazed surface finish blend with both traditional and modern kitchens.

Modern production methods and special manufacturing techniques together with the skills of our craftspeople ensures that our quality remains constant. Care throughout the production process helps to produce a sink which will maintain its appearance for years to come. Its most important properties:

- Easy to care for
- Stain and acid resistant
- Colour safe
- Completely heat resistant
- Hygienic and suitable for food preparation

## SILGRANIT® PuraDur®

SILGRANIT® PuraDur® is a unique 'easy care' sink material which has been patented and developed exclusively by BLANCO.

- Hygiene+Plus is a shield against dirt and bacteria
- Easier cleaning, thanks to the unique patented hygiene protection formula
- SILGRANIT® PuraDur® is antibacterial. Tests confirm that the unique built-in hygiene protection reduces bacterial growth by an average of 98%
- Superior durability and a smooth silk surface with the look and feel of natural stone
- Available in attractive colours all with a uniform surface finish

SILGRANIT® PuraDur® with the patented hygiene protection formula

# Sinks

## Cabinet Width

The cabinet width measurement denotes the measurement (mm) which the sink bowl(s) need to fit into.

## Sink Style Options

**Inset:** The frame of an inset sink sits on top of the work surface. These sinks are compatible with any work surface, including laminate worktops.

**Undermount:** An undermount sink is installed underneath the worktop, only compatible with solid surface worktops such as granite or solid wood.

**Belfast:** Belfast sinks are installed either 'dropped-on' to a purpose-built cabinet or by using installation brackets.

## Inset Sink Profiles

BLANCO sinks come with a range of different profiles.

**Standard:** Edge is rolled over to meet the worktop.

**IF and IF/A:** Unique 1 mm flat edge profile.

## Bowl Configuration

Ensure you choose the correct sink configuration for your kitchen.

**LHB, RHB and UNI (Universal):** Indicates whether an inset sink is available with a Left Hand Bowl (LHB) or Right Hand Bowl (RHB).

UNI (Universal) indicates an inset sink suitable for both left and right configurations.

If the sink does not have a drainer, the handing refers to the Main Bowl.

---

# Taps

## Water Pressure

BLANCO has a range of taps suitable for low and high pressure systems.

BLANCO considers taps 0.3 bar and below as low pressure.

## Features

**Aerator:** Mixes air into the flow of water to give a champagne-like flow. Some taps are fitted with a flow straightener; however, some of our taps are fitted with an aerator which are highlighted by this icon.

**Pull-Out Spray:** Features a pull-out spray, useful for directional rinsing.

**Colour options**

**Dual Flow**

**Recommended solid work surface worktop or Silgranit sink:**

Alternatively with the use of a tap stabilising bracket, code: BL450775 or BL467720

# Choosing your ideal sink

As the kitchen sink is seen as the heart of the kitchen, it is the perfect starting point for creating your dream kitchen. Let your imagination run free with a range of fabulous options to help you maximise space and accentuate the look of the entire room. There are, however, certain functional considerations to take into account and the following information will help to ensure that your ideal sink is the perfect fit for your ideal kitchen.

## Installation formats

Sinks can be installed in three ways depending on your kitchen worktop and your preference

### Inset sinks

Inset sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

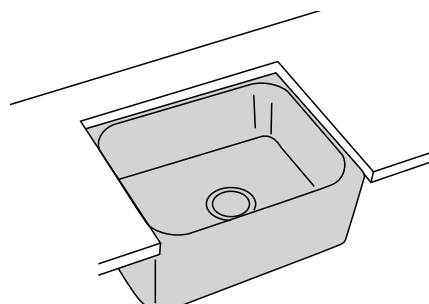

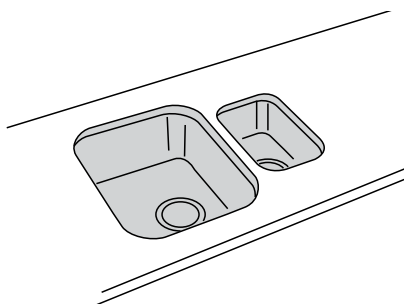

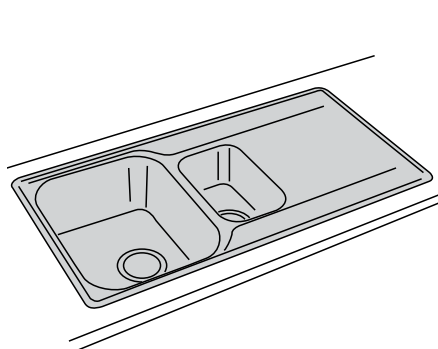

### Undermount sinks

Undermount sinks are installed underneath the work surface and therefore require a solid surface worktop such as granite or wood; they are not compatible with laminate work surfaces.

### Belfast sinks

Belfast sinks can be used as either a freestanding feature with brackets or sit on top of the base units.

---

## Installation formats

It is essential to measure correctly the cabinet width where your sink will be installed. The bowl, or bowls in the case of a multi-bowl sink, will need to fit into this space. Each sink in this brochure will show a cabinet size, and your cabinet width needs to be equal to or greater than the stated measurement.

◀450▶

◀600▶

◀900▶

---

## Bowl and drainer configuration

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of two separate working bowls.

For sinks it is important to decide on which side you require the large bowl. BLANCO refers to the large bowl when stating if it is a Right Hand Bowl (**RH**) or Left Hand Bowl (**LH**).

Other sinks are reversible which indicates the bowl/bowls can be positioned on either side. Please check which format suits your kitchen best before ordering.

Single bowl

# Taps to complement the ideal sink

## Included in the pack

All sink and tap packs in the SELECTIONS range include the BLANCO CREST cruciform monobloc quarter turn mixer tap.

- Single loop lever monobloc mixer tap
- Ceramic disc valve
- 15mm copper inlets
- Suitable for low pressure gravity and pressure systems (max 5.0 bar), minimum of 0.3 bar pressure (approx. 3 metre head)

## Tap upgrades

In addition to the regular BLANCO CREST tap you can upgrade to the BLANCO SPICE monobloc mixer tap.

- Cruciform monobloc mixer tap
- Compact soft line features
- Ceramic disc valves
- 15mm copper tails inlets
- Suitable for low pressure gravity and pressure systems (max 5.0 bar), minimum of 0.3 bar pressure (approx. 3 metre head)

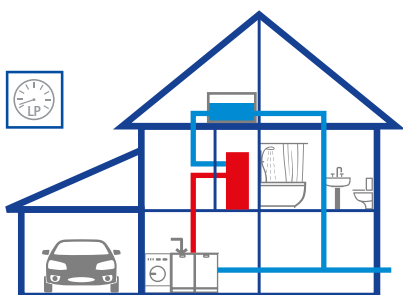

## ISE food disposer

A growing concern to us all is food waste; it is estimated that over 60% of all household waste is food from preparation and leftovers.

One solution to dispose effectively of unwanted food is to fit your new kitchen sink with a waste disposer. The ISE unit is fitted in the sink waste and shreds food into small particles which are rinsed away with the waste water. Just consider no more bin smells in the summer and less time required for wrapping up unwanted food for safe disposal.

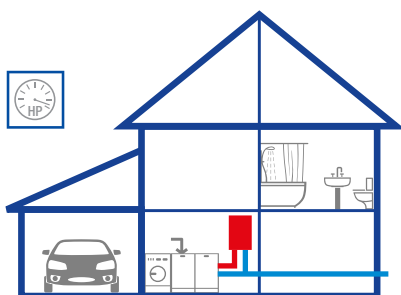

## Tap flow rates explained

Before choosing your BLANCO tap it is essential to check whether you have a high or low pressure water system.

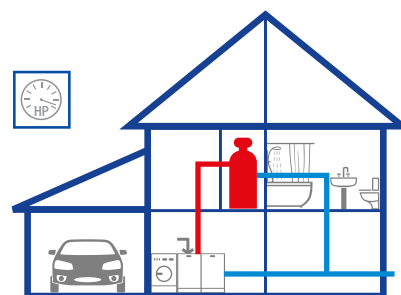

### Low pressure (Gravity-fed system)

You have a cold water tank in your attic and a hot water tank in your airing cupboard. You should choose taps which state they are suitable for a low pressure system.

### High pressure (Combi-boiler system)

You have a boiler unit but no hot water cylinder, the boiler unit is usually found in the kitchen and delivers hot water on demand. You should be able to choose from most of our taps.

### High pressure (Pumped system)

You have a hot water cylinder with an expansion vessel on top (often called Megaflo), usually found in the airing cupboard, but you do not have a cold water tank. You should be able to choose any of our taps.

At BLANCO we consider anything 0.3 bar or below as low pressure. Any higher is considered high pressure.

# Complete your ideal kitchen

## Find a sink to suit your style

To help you navigate the wide range of design, installation and functionality surrounding your choice of sink, you'll have detailed information at your fingertips. Each option is explained fully over the following pages.

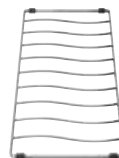

## Add your perfect tap

BLANCO taps combine outstanding performance and stunning design to suit your taste – whatever it may be. Our taps are designed to fit a standard 35mm tap hole (except where indicated). It is also important to identify whether your home has a high or low pressure water system, as it will affect your choice of tap – your installer or kitchen retailer should be able to help with this.

## Choose accessories & extras

We also have a number of stylish and innovative products including food boards, colanders and crockery baskets that are designed to enhance the aesthetics and functionality of your sink, streamlining kitchen tasks and creating a fully functioning workstation.

**SILGRANIT® PuraDur®** Colours

The need for the perfect look combined with the ultimate in quality and functionality makes BLANCO mixer taps the tap of choice. When it comes to buying a kitchen tap, you should never compromise, what counts above all else is quality.

For over 90 years, BLANCO has been at home in the kitchen, developing an extensive range of mixer taps and have perfected solutions for added value in every kitchen.

BLANCO's innovative tap range consists of models with spray hose that increase the working radius, colour combinations to match your sink and a variety of jet options to suit your needs.

## BLANCO SELECTIONS | Tap upgrades

All sinks sold in this brochure come with the high quality CREST tap included in the pack price, however, you can make your kitchen more individual by upgrading to one of our extensive individual range of taps.

If cooking aromas are left unchecked they can quickly build up and leave unwanted grease and dirt deposits on the walls and furniture which may eventually spoil the appearance of your kitchen. Today's kitchen designers and developers understand and recommend that an extractor hood is an essential part of any kitchen design. BLANCO extractor hoods are designed for extracting air through a wall to the outside or for re-circulating filtered air back into the kitchen. Extraction to the outside is recommended wherever possible providing the cooking area is situated on or close to the outside wall.

BLANCO hobs are designed and built with the well-established BLANCO quality in mind. With contemporary designs and high quality materials, our hobs add style and performance to any kitchen. Minimum joints and seams ensure there are fewer areas for grease to build up, making the hob easier to clean and ultimately more hygienic. All BLANCO hobs boast innovative features to make cooking safer and more enjoyable and they are rigorously tested to withstand many years of use, even in the busiest kitchens.
